---

The safety council reviewed PB#2019-402 for the subdivision. The only exception noted is the naming of the street to Hillside Avenue. It is strongly recommended the developer consider another name for the street, as there is also a Hillside Avenue in the Leonardo section of the town, and a Hillside Avenue near the train station, As well as a Hillside Street in River Plaza. For emergency situations, this name would be irresponsible as the address could be confused with another, causing unnecessary delays.

A perfect example of this was two weeks ago, when a motor vehicle accident was reported at Harmony Avenue and Thompson Avenue. The incident was actually at Harmony Road and Thompson Avenue, and resulted in the death of the driver, it is believed from a medical condition. While it is not known of the delay contributed to the driver's passing, it certainly didn't help that responders were heading in the wrong direction.
