Middletown Township is embarking on a significant journey to develop a comprehensive Master Plan, the first in nearly two decades, to chart the course of our Township's future. This Master Plan, a meticulous roadmap, will guide planning decisions reflecting our community's vision, goals, and recommendations for the economic, social, physical, environmental, and fiscal development of Middletown.

Our community’s active involvement is an essential pillar of this process. The Master Plan is not only about the Township; it is every bit about its residents who live, work, and contribute to its vibrant fabric daily.

## New Jersey American Water Plans for Temporary Water Treatment Changes Beginning Next Week

As part of an annual maintenance program for its water distribution system, New Jersey American

Water (NJAW) will temporarily change the water treatment process from a chloramine (combination) residual to free chlorine residual at the company's Swimming River Water Treatment Plant in Colts Neck and its Jumping Brook Water Treatment Plant in Neptune.

The temporary treatment process will begin the week of February 12, 2024 and continue until mid-April 2024. During this period, some customers may notice a slight taste and smell of chlorine in their water. This is normal and will only be temporary until the system maintenance is complete. Customers who wish to reduce the taste of chlorine can place water in an uncovered glass container in the refrigerator overnight to dissipate chlorine faster.
