IMPORTANT NOTICE REGARDING BABY FORMULA:

UNDER NO CIRCUMSTANCES should parents water down baby formula because the exact formulation is needed to give babies enough calories and adding water to formula can cause a dangerous drop in baby's sodium level. This could lead to serious complications such as seizures.

If you find yourself in an emergency where you need formula and are unable to access it through deliver, the American Academy of Pediatrics recommends the following:

Feeding America is a non-profit network of 200 food banks. Many provide free baby food and infant formula. Find your local food bank.

Dial 2-1-1 to be connected to a community resource specialist who can help you find local resources.
